March 2017 - present, Seattle

Software Developer - Amazon UI

We are building a new templating language and it's IDE plugins. Owned the UI design and implementation of a dashboard, JS error monitoring tool and a documentation platform. Collaborated with teams in Jordan to enable right-to-left for our UI components to support the UAE launch. Worked on the site-wide redesign of Amazon, acting as the bridge between our design and dev team.

I focus on creating functional, meaningful and aesthetic solutions through design and code.

July 2015 - March 2017, Bangalore

Software Developer - Amazon Fashion

Worked on the design and development of features in the Amazon Retail space. Part of the dev team for Prime Wardrobe. My idea at a brainstorming session is now Amazon Spark.

Education

Birla Institute of Technology
Bachelors of Technology
Computer Science
2011 - 2015

June 2013 - July 2013, New Delhi

Design Intern - Safety Kart
